

Manage and operate MatiSight™ IP Camera 3/3

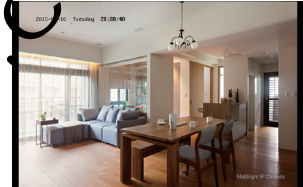

Appendix: How MatiSight™ works when alarm occurs?

1. If a thief intrudes and triggers some accessory alarm, the emergency contacts would get informing SMS and alarming call right after that.

2. Magictri™ captures the informing SMS right after that and reminds the user to check live video from the camera paired before. Users get informed immediately even when the App is exited.

3. Just one tap to show you the real-time video! The thief is nowhere to hide!
